

Families in rural Peru have improved stoves with the help of partner ITYF.

Radha's Letter

Dear Friends,

First, I want to say thank you to the many of you who responded to our end of year survey last month. Your acknowledgement of our successes in 2015 and feedback on areas for improvement in the coming years is appreciated and will be taken into account by the Alliance team. We have already used the first couple of weeks of the year to finalize our priorities for 2016. There are two broad areas of focus for us this year continuing to support the strengthening of the clean cooking sector and mainstreaming the issue of clean cooking as an effective intervention to achieve public health, climate and environment,

women empowerment, access to energy and livelihood objectives.

We are continuing our efforts to advocate for the inclusion of cooking related indicators to measure progress against several of the Sustainable Development Goals (SDGs) and we will also be supporting focus country ministries with the design of the clean cooking components...

The Global Alliance for Clean Cookstoves is a United Nations Foundation-hosted public-private partnership to save lives, improve livelihoods, empower women, and protect the environment by creating a thriving global market for clean and efficient household cooking solutions. The Alliance's goal calls for 100 million households to adopt clean and efficient stoves and fuels by 2020. The Alliance is working with over 1300 public, private, and non-profit partners to accelerate the production, deployment, and use of clean cookstoves and fuels in the developing world.
