Consumer  
Segmentation  
Study in  
Guatemala

Alliance Welcomes  
New Staff in Latin  
America, India,  
and Washington,  
DC

Dear Friends,

I hope the new year is off to a good start. The Alliance team has just concluded a few days of meetings in Washington DC to share, discuss and finalize our plans and deliverables for 2015. We look forward to a productive year working together with all of you as we kick off Phase 2 of our efforts.

This year 2015 is particularly important on the global front with many different issues that we care deeply about having prominence on the global stage. We will advocate strongly to ensure that clean cooking and the issue of household air pollution are included, and indicators developed, to measure progress in the Beijing+20, Post-2015 development agenda, and COP21 discussions. Clean cooking is one of a few interventions that can have a tangible impact across all three of these areas...

**About the Global Alliance for Clean Cookstoves**

The Global Alliance for Clean Cookstoves is a United Nations Foundation-led public-private partnership to save lives, improve livelihoods, empower women, and protect the environment by creating a thriving global market for clean and efficient household cooking solutions. The Alliance's goal calls for 100 million households to adopt clean and efficient stoves and fuels by 2020. The Alliance is working with over 1000 public, private, and non-profit partners to help overcome the market barriers that currently impede the production, deployment, and use of clean cookstoves and fuels in the developing world.
